

SITUATION

Governments around the world are starting a petition to outlaw super-powers from being used; if caught using their powers, superheroes could face a life-time prison sentence.

Therefore, superheroes have decided to start a charity of their own to build support for their cause.

Your task is to create a splash page for the superheroes outlining why they are important to society and link it to a donation page you create for them.

OBJECTIVE

Please pull information for the superheroes you choose on your splash page using Marvels API (<https://developer.marvel.com/>). Your donation form doesn't need to process any transactions, nor does it have to go past the donor information page (i.e. confirmation/thank you page is not needed).

Finally, this is your opportunity to showcase your skill set and highlight your personality and creativity. Have fun and show us what you can do!

We look forward to seeing what you create!

Please send your final project to us in a zipped file to euastone@deloitte.ca
